

Corrected kidney and spleen HVG models: manually retained pathway programs

Kidney

Spleen

ECM proteoglycans

T-cell receptor signaling

WNT signaling

Neutrophil degranulation program

IGF transport and uptake

C-type lectin receptor signaling

Flight minus ground expiMap pathway shift

Flight minus ground expiMap pathway shift

- OSDR project, seed 2020
- ◆ Median and range across three complete trainings

- Prior-literature aligned
- Complementary process hypothesis
