

Broad pathway screen: highest absolute effects per tissue

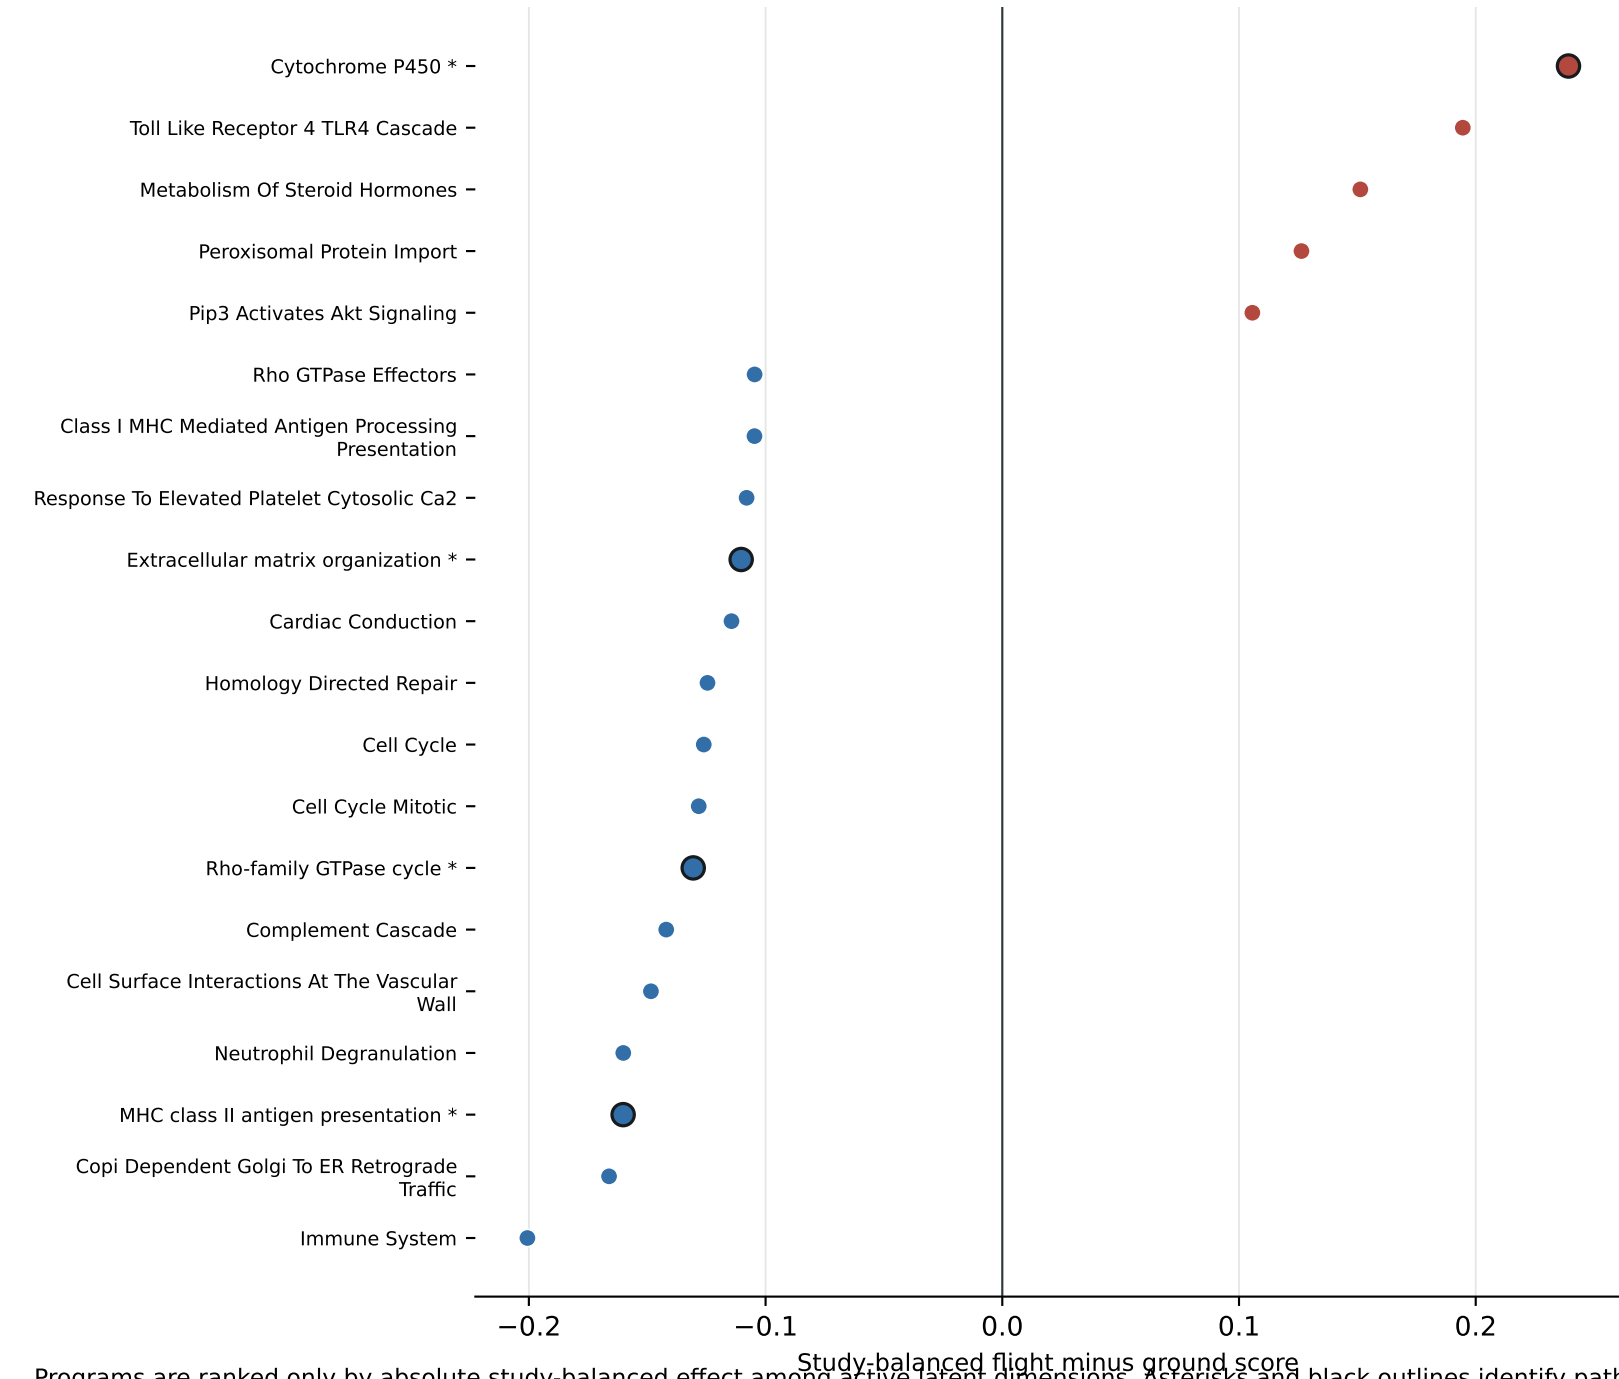

Thymus | top 20 of 283 active programs

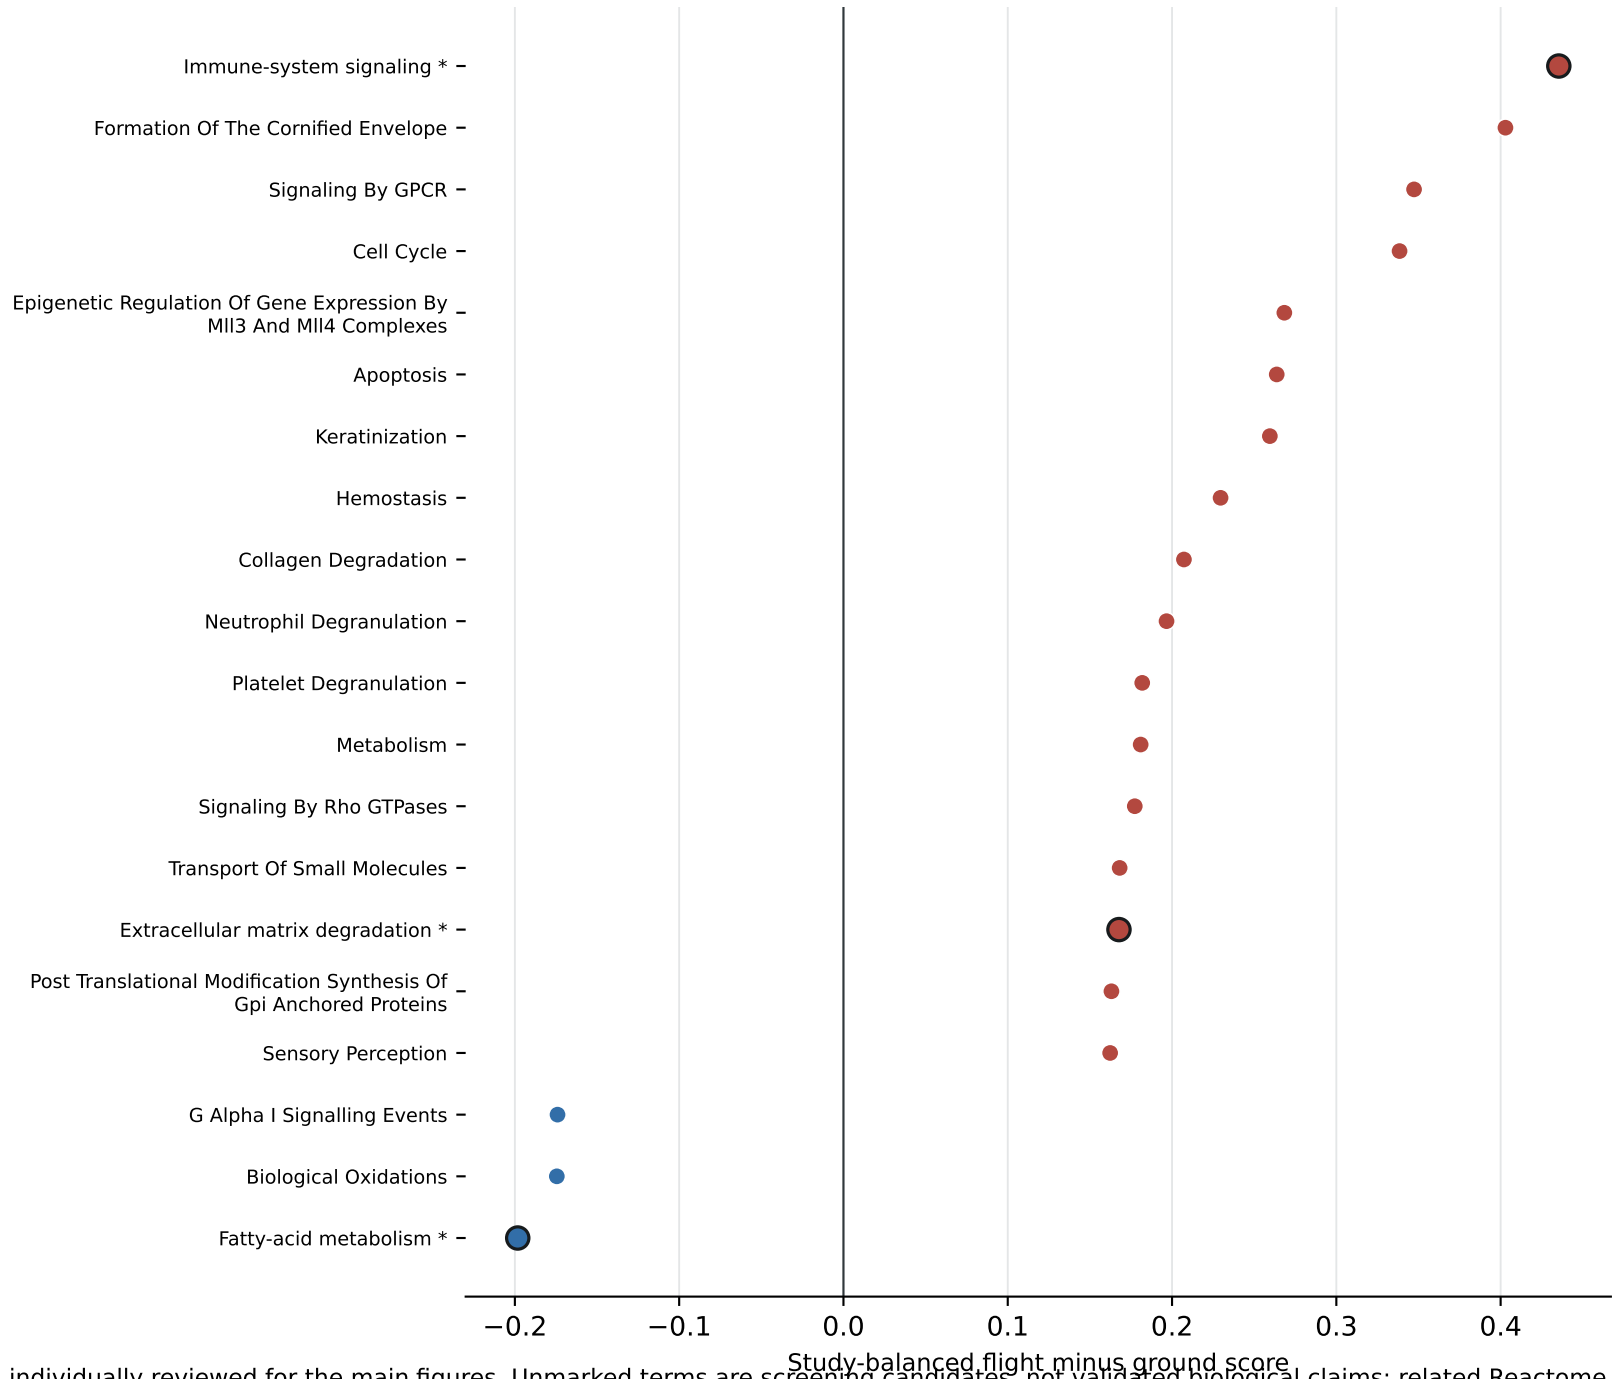

Skin | top 20 of 291 active programs

Liver | top 20 of 346 active programs

Soleus | top 20 of 295 active programs

Programs are ranked only by absolute study-balanced effect among active latent dimensions. Asterisks and black outlines identify pathways individually reviewed for the main figures. Unmarked terms are screening candidates, not validated biological claims; related Reactome terms are not independent.
